

“Experiential learning - auditing beyond theory “

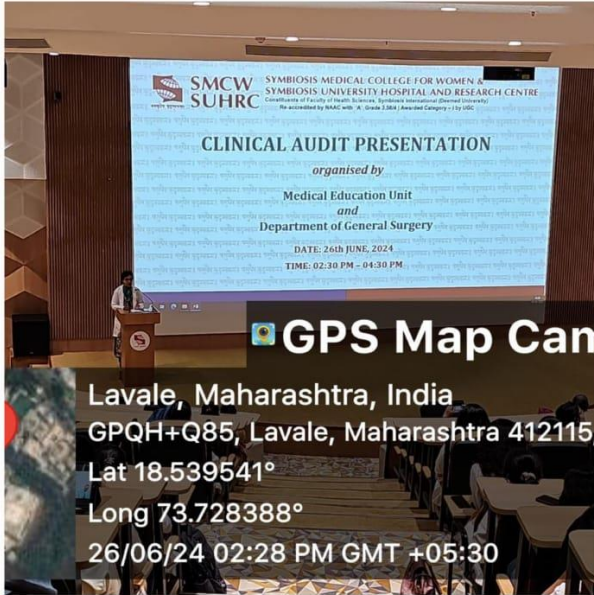

The Department of Medical Education and the Department of Surgery, Symbiosis Medical College for women & Symbiosis University Hospital & Research Centre, conducted an audit presentation by students on “Experiential learning - auditing beyond theory “at Moringa Auditorium. The half-day event was held on June 26, 2024, from 2:30 PM to 4:30 PM.

There were five audit presentations by students of MBBS-Phase III part II students, followed by intervention from faculty from the Departments of Surgery, Anaesthesia, Microbiology, and Forensic Medicine. The aim of the event was experiential learning, which was enhanced by an interactive lecture on surgical audit—auditing beyond theory. This provided a practical learning experience, complemented by actual practice in the workplace for MBBS-Phase III part II students.

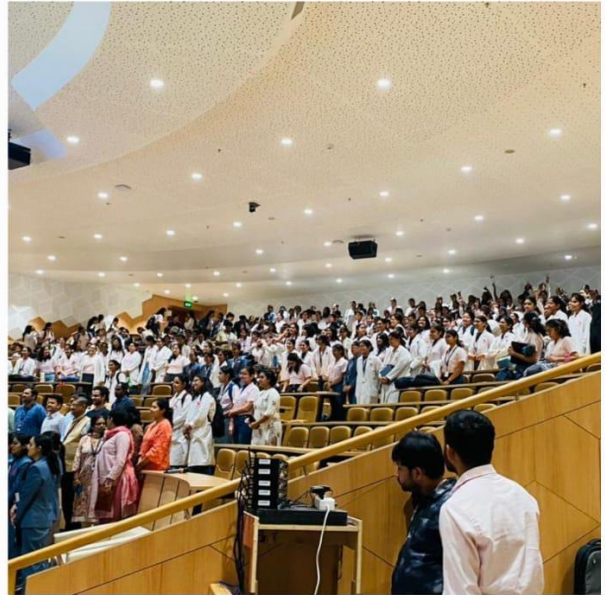

The students gained valuable insights into clinical audit with 469 attendees including faculty, stakeholders, OT staff, technicians, nursing staff, and MBBS students from all phases. The program was well-received, with positive feedback highlighting the success of the event.
